- There are 26 questions on this test:
  - 20 are multiple choice and worth 4 points each;
  - 6 are free response and worth 10 points each.
- Calculators are NOT allowed. Answers are to be given in a form that could be typed into a calculator and use units as necessary. I do NOT need to simplify arithmetic / algebraic expressions.
- I am expected to SHOW ALL WORK on the free response questions; no credit will be given for correct answers without supporting work.
- Partial credit may be awarded on multiple choice questions, but it will be based on my answer only; work may be shown but will not be graded.
- Notation and clarity count. My job is to communicate mathematically and make what I am thinking clear.
- I will sign the Honor Pledge when I am finished or I will let my instructor know of any irregularities with this exam.
